Respected Mam,

I am a final year student at Birat Kshitiz College dedicated to applying for the Internship opportunity as a Web Developer at Hash Technologies. I would be delighted to bring my knowledge, skills, and experiences that I have achieved during my college years to opportunity. I might not be an expert, but I am excellent at learning and giving my best in situations.

I consider myself an innovative and hardworking learner. Having strong enthusiasm, I could be a potential member at Hash Technologies.

I have developed some projects during my study period. I also have worked with others in editing some websites. As a final year project, I have worked in a team of two to develop a Web application called FollowUp, a record management system using the Laravel framework of PHP.

I might not be the best, but I thrive on achieving that title under your guidance and supervision to expand my knowledge to a greater depth. I will look forward to hearing from you.
Thank you for your time and consideration.

Yours Sincerely,

Sanu Koirala
